

## Resuscitation Timetable

Friday 27<sup>th</sup> April

TIME	TOPIC	SPEAKER	CHAIR
08:30	Opening Ceremony – mihi whakatau Richard and Aickin		
09:00	<b>Critical Thinking and Healthcare Safety</b> Most of us do enough thinking to get by but we sometimes fall short of our potential. There are increasing concerns that secondary and post secondary educational curricular place insufficient emphasis on critical thinking. This translates into medical graduates who are deficient in these skills and the strong likelihood of an impact on the safety and quality of healthcare. Critical thinkers are among the most highly calibrated decision makers. This session overviews the characteristics of critical thinking and its importance in clinical medicine.	Pat Croskerry	Richard Aickin
	Incremental improvements to maximize survival from cardiac arrest	Mary Fran Hazinski	
<b>10:30 – 11:00</b>	<b>MORNING TEA</b>		
	Science and evaluation supporting recent guideline changes and new papers published since 2010	Peter Morley	Lindsay Mildenhall
	Aus – ROC	Judith Finn	
	Update on ILCOR	Ian Jacobs	
<b>12:30 – 13:30</b>	<b>LUNCH</b>		
	<b>Early Warning Scores</b> The History and Evaluation of Paediatric Early Warning Scores  Why Paper Systems Don't work  Cognitive Debiasing: Much of our 'thinking' time is spent in the intuitive mode of reasoning which is known to be vulnerable to error. The intuitive system is especially vulnerable to cognitive and affective bias and therefore it is important that we understand strategies for effective debiasing. This session reviews the theoretical basis of debiasing and the many practical strategies to achieve it	Gabrielle Nuthall  Rob Frengly  Pat Croskerry	Kevin Nation
<b>15:00 – 15:30</b>	<b>AFTERNOON TEA</b>		
	<b>End Of Life Issues</b> CPR and the patients best interests: ethic's , law and policy.	Ron Patterson	Tony Scott
	Differentiating Not for CRP from DNR	Mary Seddon	
	A North American and Pediatric Perspective on Advanced Life Directives	Mary Fran Hazinski	
<b>17:00</b>			

## Resuscitation Timetable

Saturday 28<sup>th</sup> April

TIME	TOPIC	SPEAKER	CHAIR
09:00	Pitfalls in translating the evidence into clinical practice	Mary Fran Hazinski	Gabrielle Nuthall
	Clinical decision making: Arguably, how we make decisions is the most important part of clinical performance, and of healthcare. This session is an overview of how we make decisions in the clinical setting – based mostly on the Dual Process Model of reasoning	Pat Croskerry	
<b>10:30 – 11:00</b>	<b>MORNING TEA</b>		
	Earthquake 1- In the Emergency Department	Mike Adargh	Tonia Nicholson
	Earthquake 2- At Ground Zero	Jeff Brown	
	Initial response at the scene	Tony Smith	
<b>12:30 – 13:30</b>	<b>LUNCH</b>		
	<u>Free Papers</u> ▪ 7 papers (1½ hrs)		Rob Frengly & Lindsay Mildenhall
<b>15:00 – 15:30</b>	<b>AFTERNOON TEA</b>		
	Oxygen Toxicity	Lindsay Mildenhall	Gabrielle Nuthall
	<u>Pro – Con Debate</u> Intubation equipment is essential on resuscitation trolleys	To be announced	Richard Aickin
<b>17:00 – 17:15</b>	Closing Remarks and Closing Ceremony		Richard Aickin
